

OMTG - Activities

The principal activities of the Group are,

- 1) an annual evening meeting during SPIE's Optics and Photonics Symposium including a speaker of interest to the community followed by an open forum formatted as a "Problems and Solutions Workshop" and
- 2) a biennial technical conference, also at SPIE's Optics and Photonics Symposium in the odd-numbered years that covers about two days of technical papers and an evening poster session (both totaling 35 to 50 technical papers).
